TECHNICAL CHARACTERISTICS

SESP

Espai

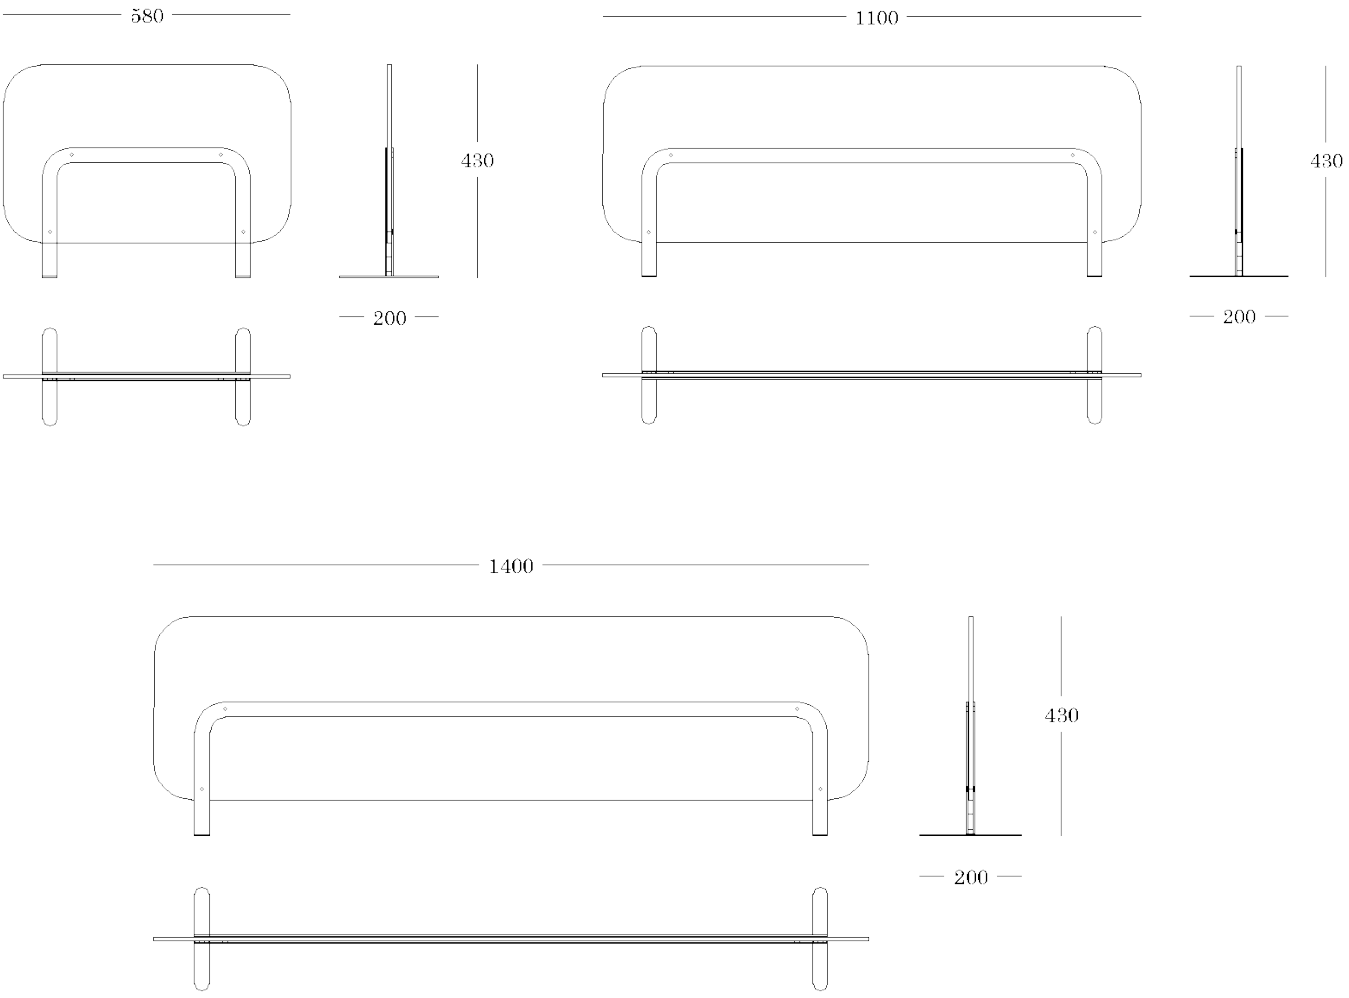

Divider

The Espai collection consists of dividing panels, which flow across the desktop, moving closer, moving away, looking for an answer to a new way of understanding the workspace, both individual or shared. The Espai dividers are built with recycled felt material, made 60-70% of recycled plastic bottles: the brand's new commitment to Eco-Design. Shelves, hooks, vases and memo boards give shape to a large family of accessories which, added to the wide variety of colours, result in an array of compositions for you to personalize your workspace and to have it all within reach.

COMPONENTS

FRAME

Material
3 mm (0.1") thickness cold laminated St-37 quality steel sheet, laser cut. Tensile Strength: 340-470 N/mm2 (49,300-68,160 psi); Elastic Limit > 235 N/mm2 (32,080 psi); Elongation > 25%, Surface Hardness > 110 HB.

Finish
Colour epoxy

DIVIDER PANEL

Material
9mm thick inner felt. Made of PET with 60% recycled origin from plastic bottles. Espai S contains 12 recycled bottles, M 17 and L contains 27 bottles of recycles PET.
Tested under fire regulations with a high acoustic absorption index. NRC: 0.55, α = 0.40

Finish
Gray tones

METAL FINISHES

EPOXIS
Powder covering formulated with polyester resins, with good both mechanical and chemical properties, outdoor maximum resistance and noxious compound free. Electrostatic application and oven curated at 200ºC (392ºF).

Technical Characteristics:
Thickness (ISO 2360): between 60 and 90 µm.
Adherence (ISO 2409): Grade: 0 (maximum adherence).
